

# An ultra modern brand new site

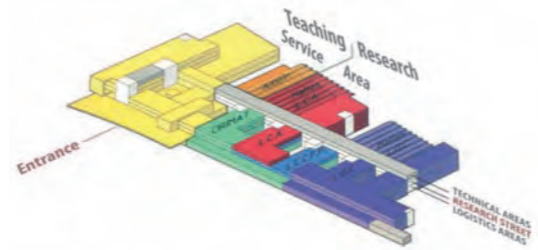

The campus lies on a green area surrounded by trees. The site is laid out over a north-east to south-west grid.

The architecture of the building distributes all the devices on the same structure, conceived so that the traffic can be made from a point to the other one with harmony and fluidity.

The new building is 100% accessible for the disabled.

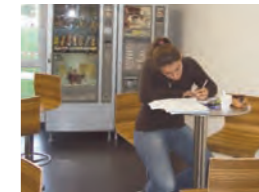

A7 has recently acquired new buildings on the Toulouse-Labège campus designed and constructed specifically to meet its requirements and reflect the A7 approach.

## Student halls

The student halls are ideally located in the heart of Toulouse-Labège and include 300 new and furnished accommodation units. This new generation of student residences offers a wide range of services, such as an automatic laundrette, a rest area and a television lounge, wifi internet access and even study rooms, not forgetting a private car park and bike shed. Students can relax in the residence in the knowledge that security is guaranteed thanks to a management system and an on-call 24/7 security service.

Saint Sermin's Basilica, a jewel of romanesque architecture

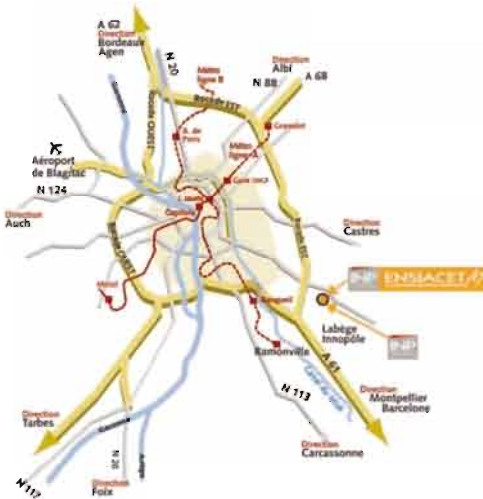

Cité de l'espace (City of space), a fun and educational scientific theme park

The Canal du Midi (Midi canal), classified as Unesco world heritage

The cloister of the Jacobins, a haven of peace and beauty in the heart of the town centre. A piano festival is organised here in the autumn.
